SUMMARY

Full-stack web and mobile developer

I am a full-stack web and mobile developer with approximately 2 years of experience, actively seeking a full-time job. My expertise spans both front-end (React) and back-end (Express.js) technologies, encompassing the entire software development process. Staying updated with industry trends is crucial for my ongoing professional growth, and I am eager to contribute my skills and experience in a new role.

WORK EXPERIENCE

Mobile developer

Jun 2022 – onwards

ImaginePartners

- Mobile Dating Application Development: Successfully conceptualized, designed, and developed a mobile dating application from the ground up
- User Experience Enhancement: Implemented strategic improvements to enhance the overall user experience, focusing on user interface design, intuitive navigation, and streamlined interactions.
- Responsive Design Implementation: Ensured a seamless user experience across various devices by incorporating responsive design principles, optimizing the application's performance on both smartphones and tablets.
- Cross-Platform Development: Implemented cross-platform compatibility using React Native framework, allowing the dating application to seamlessly run on both iOS and Android platforms.
- NoSQL Database Selection: Chose MongoDB as the database solution for its NoSQL nature, providing flexibility in handling unstructured or semi-structured data typical in a dating application.
- Mobile shopping application Development: Successfully conceptualized, designed, and developed a mobile shopping application from the ground up
- Efficient Frontend Development: Employed React Native's component-based structure for the mobile app and Next.js for the back office, enhancing development efficiency through code reusability and modularity.
- Database Management with PostgreSQL: Integrated PostgreSQL as the database solution, leveraging its relational model for efficient data management, especially in scenarios where structured data relationships are critical, such as in a back office environment.
- Product Catalog Management: Integrated a robust product catalog management system, allowing easy addition, editing, and removal of products with detailed attributes and images.
- Payment Gateway Integration: Integrated popular and secure payment gateways to facilitate smooth and secure online transactions, providing users with multiple payment options.
